Gym Management System – Data Flow Diagram (Level 0)

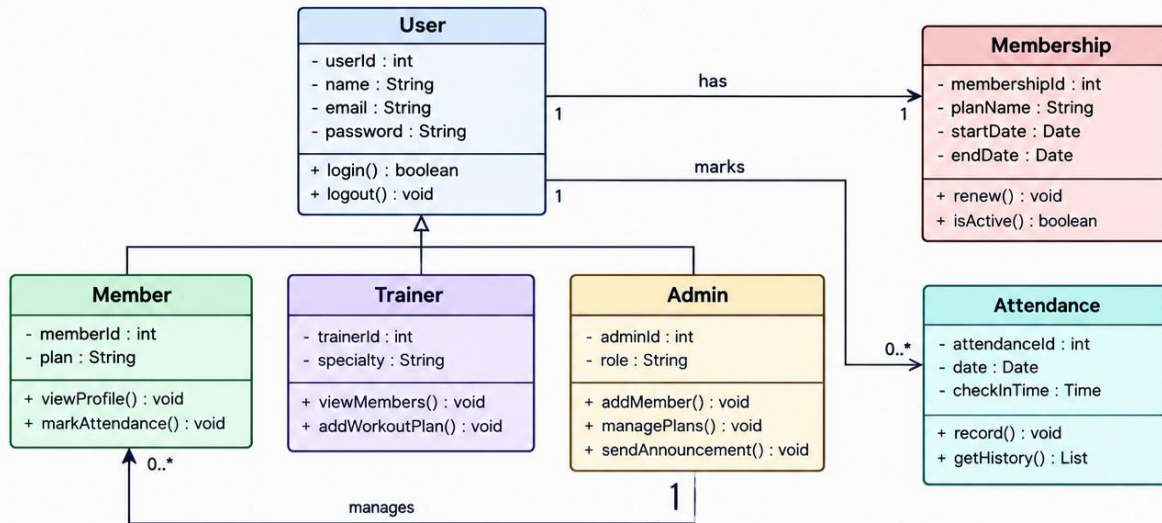

How it works (in simple words):

- 1 Member logs in or registers on the system. The system checks the data and gives access.
- 2 Member can view profile, check attendance and receive notifications.
- 3 Trainer logs in to see assigned members and attendance records.
- 4 Admin logs in to manage members, membership plans, view reports and send announcements.
- 5 The system stores and updates all data in the database (members, attendance, memberships).
- 6 For notifications (like messages or alerts), the system uses an external service (email/SMS).
